

HIGHLIGHTS FROM 2014

- * **Sherren's Pond:** Phase One, installed natural fish ladder from east branch to dam for fish passage into pond and upstream to spawn.
- * **Englewood Trail:** Cleared up dangerous garbage dump (glass, tin, plastic, medical needles) alongside trail used by kids.
- * **Crapaud village:** Cleared blockage of fallen trees, human garbage, etc., causing serious bank erosion and siltation on west branch.

WESTMORELAND RIVER WATERSHED GROUP

PO Box 36, Crapaud, PEI, C0A 1J0
902-730-2052

Membership only \$10/year

GARBAGE !

Garbage is not good for our watershed and its inhabitants.

- * It may contain dangerous chemicals and pollutants
- * It may cause injury to children
- * It may cause injury to wildlife
- * It is an eyesore

TIPS FOR HEALTH

- * Please use the Island Waste Management system for all your garbage.
- * Please educate your children to be responsible about garbage.
- * Please contact us if you come across dumped garbage.

YOUR COMMUNITY!**

*Please help us preserve this valuable
environment.*

INVASIVE SPECIES

are non-native species causing serious
trouble to a native environment

- * They out-compete native species
- * They have no predators
- * They destroy local natural resources
- * They cause loss of biodiversity

HOW DO THEY SPREAD?

- * through agriculture, horticulture,
tourism
- * through recreation (boating, pets,
bird seed, firewood)
- * through the exotic pet trade
- * through climate change

CTIVE**

TIPS FOR HEALTH

* Please visit www.peiinvasives.ca to
learn about invasive plants on PEI

* Please dispose of invasive plants
safely

*Place in a clear plastic bag, add an
“Invasive species” label, and leave for
pickup alongside your IWMC black bin*

TIPS FOR HEALTH

* Please don't plant invasive species as
garden ornamentals

* Please don't bend the rules by slipping
prohibited seed and plants into Canada

* Please contact us if you find invasive
plants so we can try to remove them

*Wild cucumber
drapes itself over
its victim*

*Japanese knotweed, a top-100 world invasive
species, is rife in the Crapaud area*
